

Don't be deceived by Misleading Social Credit Tactics

A WRONG USE OF ELECTION RESULTS

The Social Credit party is distributing a card on which is given the result of the vote in the federal election of August 10 in only some of the polls included in the Rosthern Provincial Constituency. The totals given are:

| | |
|---------------|------------|
| Liberal | 1484 votes |
| Social Credit | 1326 votes |

Social Creditors are saying that a change of about 100 votes will elect their candidate.

Apparently the polls listed on this card were deliberately selected with a view to mislead the people and making it appear that the Liberal candidate had a majority of only 158 over the Social Credit candidate.

THE FACTS OF THE CASE

If the proper procedure is followed and the results in all the polls in the Rosthern Provincial Constituency are used the totals are:

| | |
|---------------|------------|
| Liberal | 2475 votes |
| Social Credit | 1587 votes |

These totals show a Liberal majority of 888 instead of 158 and make it very evident that the change of 100 votes will have very little effect on the election.

WHAT KIND OF LEADERSHIP?

On the same card where this very improper use is made of the last election results there is an injunction urging the electors to "Vote Social Credit" for "Progress and Leadership".

Does a party which deliberately resorts to this kind of thing merit the support of the people of a constituency which has won an enviable reputation for faithfulness to the principles in which its people believe?

NO HOPE FOR SOCIAL CREDIT

The complete and correct figures show that the Social Credit candidate has no genuine hope of being elected and that only the Liberal candidate can defeat the C.C.F.
